Figure 1: Comparison of the proposed method with the existing methods. The figure shows a horizontal bar chart comparing the performance of the proposed method (CPU) with existing methods (GPU, 4-6, and A). The x-axis represents the performance metric, with a scale from 0 to 100. The y-axis lists the methods. The proposed method (CPU) is shown in black, while the other methods are shown in grey. The proposed method (CPU) has a performance of approximately 50, while the other methods have performance values around 25-30. The text '25%' is also present near the bottom of the chart.
